Preparing for your Tour

Climate

Tanzania

The climate is tropical but varies greatly with altitude. Coastal areas are hot and humid, the central plateau dry and arid. It can be cold at night, particularly in June & July and at altitude. Generally the long rains arrive April/May and the short rains Nov/early Dec. Although this pattern can be completely erratic. Additional information and climate charts can be accessed at <http://www.explore.co.uk/weather>. Seasonal weather patterns can be unpredictable. Up-to-date information on the weather worldwide can be found by following the BBC weather link on this page.

Luggage allowance on tour:

Unfortunately it does occasionally happen that luggage does not always reach its destination on the same flight as its owner, or possibly it may be damaged in transit. If you are unlucky enough for this to occur, it is important that you file a PIR (Property Irregularity Report) with the airline before leaving the airport. This is essential when you come to make a claim either against the airline or from your travel insurance company
