Preparing for your Tour

Climate

Uganda

Although conditions are tropical, hot and humid in the centre and west, the rest of Uganda has a pleasant and comfortable climate. The dry season is generally from December to early March and June to the end of August/early September. Temperature can vary from around 28°C during the day to 12°C in the evening. High mountain areas become much cooler at night. Most of Uganda experiences a double rainy season. Rainfall is moderate, only exceeding 1250mm a year in the higher areas. But it may rain at any time of the year, particularly in equatorial rainforest such as Bwindi. Lake Victoria influences the local weather patterns considerably and ensures the surrounding region is wetter than elsewhere. Additional information and climate charts can be accessed at <http://www.explore.co.uk/weather>. Seasonal weather patterns can be unpredictable. Up-to-date information on the weather worldwide can be found by following the BBC weather link on this page.

Unfortunately it does occasionally happen that luggage does not always reach its destination on the same flight as its owner, or possibly it may be damaged in transit. If you are unlucky enough for this to occur, it is important that you file a PIR (Property Irregularity Report) with the airline before leaving the airport. This is essential when you come to make a claim either against the airline or from your travel insurance company
