DAY 3 Walk across grassy moorland to Shira One Camp (3500m)

Today we trek across a plateau of grassy moorland and heather scattered with volcanic rock formations. Our destination for today is the camp at Shira One (3500 m), from where there are often views of Kibo Peak floating on the clouds. We gain a reasonable amount of altitude today and parts of the route are fairly steep. Today's ascent of 720 m is expected to take approximately 6 to 7 hours.

 **Included Meals:** Breakfast, Lunch, Dinner

DAY 4 Walk through upland desert to Shira Two Camp (3900m)

Today we have the chance to view the Northern Ice fields from the western side of the mountain with some unusual views of Kibo. Our steady climb across the moorland of the Shira Plateau will help with acclimatisation and we enjoy great panoramic views. Our tents will be set up for us at the Shira Two Camp (3900m). In the afternoon we will take an acclimatisation walk to the junction of the trail to the Moir Hut. The ascent of 400 m between the camps at Shira One and Two is expected to take approximately 5 hours and the acclimatisation trek an additional 2 hours.

DAY 5 Trek via Lava Tower (4640m) to Barranco (3960m)

Today's walk is longer and perfect for our acclimatisation as we will ascend to a high point of 4640 m before descending to a lower altitude for the night. Our trek starts with an ascent with far-reaching panoramic views, walking in to the climatic zone of the upland desert and on the lava ridges beneath the glaciers of the Western Breach. We reach the distinct pinnacle of the Lava Tower (4640 m), our high point for the day and a great place to enjoy a leisurely lunch. In the afternoon we make a steep descent to our camp for the night, located in the base of the Great Barranco Valley (3960 m), sheltered by towering cliffs but with extensive views of the plains below. Today's trekking is expected to take approximately 7 to 8 hours.

Overnight: **Simple Camping**
Your own tent available

 **Included Meals:** Breakfast, Lunch, Dinner

DAY 6 Trek Karanga Camp (4035m) via the Barranco Wall

Our trekking today starts with a short steep ascent of the Barranco Wall which leads to an undulating trail on the south eastern side of Kibo providing us with great views of the Southern Ice fields, if we are lucky with the weather. The terrain ranges from volcanic scree to pockets of lush vegetation as we make a gentle descent into the Karanga Valley followed by a short ascent our campsite at 4035 m. The valley is the last water point on the approach to Barafu. This afternoon we plan an acclimatisation walk towards Barafu followed by some time to rest and take in the views from camp. Today's trekking from the Barranco Valley to Karanga is expected to take approximately 3 to 4 hours and the acclimatisation walk an additional 2 hours.

Overnight: **Simple Camping**
Your own tent available

Included Meals: Breakfast, Lunch, Dinner

DAY 7 Trek across compacted scree to Barafu Camp (4640m)

This morning we make a steep climb out of the Karanga Valley following an easy path on compacted scree constantly gaining altitude with good views, until we reach our camp at Barafu (4640 m). This afternoon we rest in preparation for the final night time ascent, and plan to get a very early night! Today's ascent of 605 m is expected to take approximately 3 to 4 hours.

Overnight: **Simple Camping**
Your own tent available

Included Meals: Breakfast, Lunch, Dinner

DAY 8 Kilimanjaro summit ascent (5895m); descend to Millennium Camp (3790m)

Today we make our final ascent to the summit at 5895 m before descending over 2000 m to our last camp site. It is undoubtedly a long and strenuous day, particularly with the high altitude and extreme cold. We plan to make a midnight start as at this time the scree and potential snow are still frozen and our aim is to have summited and descended before the top layer of scree becomes wet and slippery. Our path zigzags up the scree and after passing Rebmann Glacier, we reach Stella Point (5750 m) on the crater rim. Although at times you may be able to walk for only 10 paces before you have to stop and rest, there is no doubt that it is all worth it when you reach the top. From Stella Point we continue around the crater rim to Uhuru Peak, the highest point in Africa at 5895 m. After time to enjoy your achievement and taken those all important photographs at the famous summit sign, we descend back down the scree to Barafu Camp for a rest and something to eat. It's then a virtual continuous descent down to the Millennium Camp at 3790 m where the air feels positively oxygen rich in comparison to where we have just ventured! Today's total walking is expected to take up to 14 hours. The trek from Barafu Camp to Stella Point will take 5 to 6 hours with the hike around the crater rim to Uhuru Peak another 1 to 2 hours. The descent to Millennium Camp is expected to take approximately 5 to 6 hours.

Overnight: **Simple Camping**
Your own tent available

Included Meals: Breakfast, Lunch, Dinner

DAY 9 Descend through rainforest to Mweka Gate (1630m); drive to Moshi

After a well-deserved night's sleep and rest, our final day on trek takes us down through the lush beauty of the rainforest, enjoying the increasing warmth and richness of the mountain air. The trail end is at the Mweka gate (1630 m) from where we travel by road to Moshi and back to the comforts of our lodge. We will have a well-earned lunch on arrival back in Moshi. Today's descent of 2160 m is expected to take approximately 5 to 6 hours.

Overnight: **Standard Lodge**
Single Room Available

Swimming Pool Available

Included Meals: Breakfast, Lunch, Dinner

DAY 10 Optional game drive; tour ends in Moshi

The day is left free to relax after the trek before the trip ends mid-afternoon. Weather permitting, we may be treated to some final views of Kilimanjaro from our lodge. Depending on the time of your flight you may like to join an optional game drive around the Momella Lakes area in Arusha National Park which is famed for its high giraffe population as well as elephants, hippos and buffaloes. This trip will run from approximately 0630-1300hrs.

Included Meals: Breakfast

Included Activities

As part of our Responsible Tourism program, we would like to advise of the Donate a Mosquito Net Charity. This scheme purchases mosquito nets from a local provider and donates the nets to villages in areas that are affected mostly by malaria. The nets cost US\$3.00 each and your Tour Leader will advise fully on how anyone may partake within this charitable activity if they so wish.

Accommodation and Meals

Accommodation Notes

Our Kili trek is camping based and, as you may expect, conditions are basic on the mountain, though the service from our porter team is superb. We use two man tents which will be put up and taken down by our porter team. A mess tent is provided where we take breakfast and dinner as well as tea and refreshments at the end of each days trek. We have portable toilets in toilet tents, dependant on group numbers, or the use of basic long drops at each campsite. There are no permanent washing facilities at the camps and a limited amount of water is available for washing so wet wipes come in very handy! In Moshi before and after the trek we stay at the comfortable Weru Weru River Lodge which has an outdoor swimming pool and great views of Mount Kilimanjaro on a clear day.

Trekking Details

This is an 8-day trek with an average of 5 to 7 hours trekking each day, except for the ascent of Uhuru Peak which involves 12 to 14 hours of trekking. Generally we walk at altitudes between 3000m and 5000m and we reach a maximum altitude of 5895m. The trek is fully supported by porters and staff. We have graded this trek as challenging to tough.

Altitude Description

This trip goes to an altitude where there is a risk of being affected by Acute Mountain Sickness (AMS), a common and usually harmless condition caused by reduced air pressure and a lower concentration of oxygen. Whilst the itinerary has been specifically designed to allow your body to acclimatise gradually, the speed of onset and severity - as well as the height at which AMS develops can vary greatly between individuals; being physically fit affords no special protection. If symptoms occur while on tour you must let your tour leader know immediately. For further advice when travelling at altitude we recommend visiting the medical advice website of Medex and downloading their information booklet: http://medex.org.uk/medex_book/english_version.php

Travellers with heart or lung conditions, anaemia, asthma, high blood pressure, or taking the contraceptive pill must seek the advice of their GP and specifically mention the maximum altitude the trip reaches (please refer to Tour Essentials box on front page of your Tour Notes). Please take these to your medical appointment so that your doctor has the full details of your trip.

You must have adequate travel insurance for your trip. Please ensure that your insurance policy covers you to the maximum altitude indicated above. If you have Explore insurance you will be covered to this altitude.

This trip includes night stops where we sleep at altitudes in excess of 4000m. For this reason it is suitable only for participants aged 16 and over

Climate

Tanzania

The climate is tropical but varies greatly with altitude. Coastal areas are hot and humid, the central plateau dry and arid. It can be cold at night, particularly in June & July and at altitude. Generally the long rains arrive April/May and the short rains Nov/early Dec. Although this pattern can be completely erratic. Additional information and climate charts can be accessed at <http://www.explore.co.uk/weather>. Seasonal weather patterns can be unpredictable. Up-to-date information on the weather worldwide can be found by following the BBC weather link on this page.

Clothing

Being properly equipped is one of the keys to a successful trek. Use the following check list and notes to be sure that you have what you need for the actual trek.

Jacket - After sunset, temperatures can fall below freezing. A very warm jacket is the most convenient way of keeping warm when the temperature drops. Down jackets are recommended especially for the summit attempt.

Waterproofs - Breathable jacket and trouser waterproofs made from material such as Goretex not only protects against rain and wind, but also stops you from overheating. They 'breathe' and avoid condensation that you will experience from nylon waterproofs.

Long trousers - For everyday walking, light trekking trousers are the most suitable. Jeans are not recommended as they are often difficult to walk in over longer distances and become cumbersome when wet.

Fleece jackets: Fleece jackets are essential as nights can be very cold at altitude. Make sure that your waterproof jacket is loose enough to wear over your fleeces.

Thermal underwear/base layers - Long sleeve tops and long john leggings thermal underwear is essential. Cotton clothing like t-shirts are not suitable or recommended as a base layer as they do not wick away any moisture from the skin. In extreme cold, this could lead to hypothermia. It can also contribute to chaffing of the skin in sensitive areas leading to discomfort and skin irritation.

Shorts - Shorts can be very comfortable to walk in but you must carry long trousers with you in case you get either sunburned or cold!

Waterproof gloves; a warm scarf & a warm hat - Heavy duty windproof gloves or mittens are essential. Also bring a scarf to cover your neck and a warm balaclava or a warm hat.

Note Re: Summit Night Clothing - Climbing Kilimanjaro is the equivalent of trekking from the Equator to the Pole. It is essential that you have the proper equipment and clothing to ensure you enjoy the trek and also give yourself the very best chance of reaching Uhuru Peak. After many years of trekking and reaching the summit of Kilimanjaro, we strongly recommend that you should wear the following for your summit night

Torso: You should have six or 7 layers of clothing covering your chest depending on your kit specifications. Starting from your base layer to the outer shell, you should wear a long sleeve thermal underwear layer; a comfortable long sleeve shirt; a jersey; a thin fleece; a thicker fleece and a thick waterproof and windproof outer shell that may contain a fleece lining. If you have a down jacket you may want to decrease this by one layer.

Legs: You should wear three layers of clothing covering your legs. Starting from your base layer to the outer layer, you should wear long john thermal underwear; trekking trousers and a waterproof and windproof outer shell.

Extremities: Your head must be covered by a balaclava or a warm hat and your neck should be covered by a scarf. Your hands must be covered with thick waterproof and windproof gloves. You must have thick clean warm socks for summit night. You might also wish to bring hand warmers for additional warmth for summit night. Most well stocked pharmacies/outdoor stores will have these available.

Equipment

Personal Equipment you will need to take on Trek:

Sleeping bag - As you do not carry it yourself, this may be down or synthetic, but it must be 4-season comfort rating (temperature -10 degrees celcius to -5 degrees celcius). A silk or fleece liner helps to keep your bag clean and adds an extra season.

Sleeping mat - Whilst Vaude sleeping mats are provided, they are lightweight and thin. We therefore recommend that you bring your own inflatable thermarest for added comfort and a good night's rest.

Sleeping aids - Some people find it difficult to sleep at altitude. You may find ear plugs and an eye mask useful at night.

Trekking poles - Strongly recommended and can usually be hired in Moshi, at US\$15 per pair. However, you may prefer to take your own.

Water Bottle or Platypus/Camelbak hydration system - Water along the trail must never be considered as drinkable until purified. Take at least two 2 litre personal water bottles or a system that allows for this much water. A personal supply of tablets/drops for water purification system is essential. Powdered fruit juice can be used to disguise the taste. This can be purchased in Moshi. If you elect to use a hydration system with a tube then it is essential that the bladder and tube are insulated for high altitude and below freezing temperatures.

Sunglasses/snow goggles - Essential for protection against UV rays and glare at high altitudes.

Sun hat, high factor sun cream/block & lip salve - Choose a high factor suncream (factor 30 or more) to protect your skin against the sun at high altitudes. A combination sunblock/ lipsalve is ideal for facial protection.

Torch/batteries/bulb - A head torch is essential at night in the camp and for lighting your way on the night time summit ascent. Bring plenty of spare batteries and a bulb. There are no facilities on the mountain to recharge any digital equipment.

Toiletries - Essentials are toothbrush/paste. Wet Wipes are great for an alternative to washing and a quick clean up.

Personal first aid kit - On each trek a first aid kit is carried but you should have your own blister kit, supply of plasters, aspirin and other essentials. Please do not give medicines to local people without consulting the tour leader.

Personal supplementary snacks - Although sufficient food is supplied on this tour, we recommend that you bring some high energy snacks like cereal bars and chocolate (sweets if you are lactose intolerant) with you. Dextrose and mint cake are especially good for summit night.

Swimming costume - Bring your swimming costume for a swim at the Moshi hotel.

The following equipment is provided by Explore once you are on the trek:

Two man tents, dining tent, all cooking and kitchen equipment.

Footwear

Walking Boots - We strongly recommend walking in a good, comfortable, broken in pair of boots. Trainers and tennis shoes do not give the ankle support afforded by a decent pair of walking boots. Ideally, visit a specialist outdoor pursuits shop who will offer advice. It is a good idea to carry your boots in your hand luggage on international flights or wear them. Gaiters are useful to keep snow and scree out of your boots.

Trainers or trekking sandals - You may choose to bring these which will be useful in towns and when travelling, and leave them in Moshi. It is worth bearing in mind that trekking sandals afford you little protection from stubbing your toes when walking around rock-strewn campsites at night.

Socks - It is best to wear a pair of liner socks under a pair of fairly thick loop stitch socks. This helps to protect your feet against blisters. Avoid nylon socks, they are abrasive, don't breathe well and can cause blisters.

Luggage: On Tour

Your luggage should consist of three main pieces:

Main Baggage - The item of luggage used to carry all your belongings in the hold of the plane and used to store all of the items you don't need on trek. This can be left behind at the group hotel used prior to the trek.

Trek Kitbag - Before leaving Moshi there is time to re-sort luggage into what you need on trek and what can be left in Moshi. Think about what you are taking on trek (remember your sleeping bag) and then think how big your kit bag needs to be. An ex-army type can usually be obtained cheaply. A nylon or canvas bag with a zip along the top is also suitable. Whatever you choose, it must be strong and waterproof, but the porters will carry your kit in heavy duty outer bags for added protection. Soft luggage is essential as

framed rucksacks are unsuitable. The weight limit for bag and its contents must not exceed 15 kg but you will probably find that you do not need this much.

Daysac/Rucksack: 30-35 litres recommended. During the course of a trekking day, you do not have access to the luggage which is being carried for you by the porters. In any mountain region the weather can change rapidly and you must be equipped for this eventuality. Your daysac should therefore be large enough to carry waterproofs, fleece jacket/sweater, long trousers (if walking in shorts), warm hat and gloves, sun hat, sun cream, water bottle (minimum 1 litre) and your camera. Most people normally find that this adds up to about 2 to 3kg. Other optional items in a daysac might be a diary or a book to read at lunch time. We advise you to take a waterproof rucksack cover or alternatively line the sack with a large plastic bag to keep the contents dry.

Luggage allowance on trip: 20kg

Our commitment to the environment

We are passionate about sustainable travel and work hard to create tours where your holiday delivers real benefits to the local communities. We minimise our impact by travelling in small groups, respecting local cultures, reducing waste and offsetting 100% of the CO2 from our flights.

When you travel with Explore, you are directly contributing to local economies and helping empower the people you meet. We currently support a range of charities and good causes, including: Toilet Twinning (helping to flush away poverty), Lone Buffalo Foundation (a community project based in Laos providing creative skills for young people), Dekamer (a turtle rescue centre in Turkey) and Kids Saving the Rainforest (a wildlife rescue centre in Costa Rica supported through the LATA foundation). We also care passionately about the world's wildlife. We are patrons of the Born Free Organisation and Friends of Conservation.

Cool Earth

Explore are proud to support Cool Earth in their effort to reduce global carbon dioxide levels through the prevention of deforestation in the South America rainforest. Cool Earth focus on areas in immediate danger of deforestation, supporting local communities to be forest guardians. To date 350,000 acres of rainforest has been protected. Saving rainforest also protects rare animals and plants, allows local forest communities to maintain their way of life, and protects a major source of oxygen and fresh water. When you travel on an Explore holiday we make a donation to Cool Earth that exceeds the impact of our customers flights each year.
