Preparing for your Trip

Climate

Laos

The area of Laos and Thailand is tropical 'cool' from November to February, (15 to 27 Degrees Centigrade); 'hot' from March to May (up to 38 Degrees); 'wet' from June to October (rainy, hot and muggy). Bangkok and lowland areas are sticky all year round, but the northern highlands (Luang Prabang) are more temperate with a drier heat. The so-called 'cool' season can get very cold in the uplands at night and in the morning, bring a fleece.

Cambodia

Cambodia is a hot and tropical country, being hottest in April and coolest in January (still high 20s). Although rainfall is at its maximum in October, Phnom Penh and Siem Reap receive very little rain compared to the coastal areas, and when it does rain it tends to be in the form of sporadic mid afternoon downpours. There is normally very little rain between December and March.

EXPLORE! Share your experiences with us

Thailand

Generally hot with high humidity. There is some rainfall from April to September with most days being hot (around 33 Degrees) and a light breeze on the islands. If it does rain, it will be more of a heavy tropical downpour that lasts a few hours. Additional information and climate charts can be accessed at <http://www.explore.co.uk/weather>.

Luggage allowance on trip:

Unfortunately it does occasionally happen that luggage does not always reach its destination on the same flight as its owner, or possibly it may be damaged in transit. If you are unlucky enough for this to occur, it is important that you file a PIR (Property Irregularity Report) with the airline before leaving the airport. This is essential when you come to make a claim either against the airline or from your travel insurance company
