Classic Antarctica - M/S Fram

Antarctica awaits

The South Shetland Islands and Antarctic Peninsula form one of the most spectacular wildernesses on earth. A remarkable collection of wildlife lives in the shadow of snow-capped mountains and blue icebergs; penguins, whales and a rich diversity of birdlife await you on an exploratory journey of the Great White Continent.

Wildlife

Whales

Thanks to the abundance of the small, shrimp like krill as the basis of the food chain, many species of whales make the water south of the Antarctic Convergence their summer home. Some of the species found in the frigid southern waters include: the Humpback Whale who consumes over a ton of krill each day; the Southern Right Whales easily identified by the whitish callosities on the jaws and forehead; the Sperm Whales made famous in Moby Dick; the Killer Whale which is actually not a whale at all but the largest of the dolphin family; the Sei Whale which can achieve speeds up to 55 km/h over short distances; the playful Minke Whales very common in the peninsula area; the Fin Whale who can attain a length of 25 to 27 meters making them the second largest whales; and the Blue Whale which is not only the largest whale in the oceans but also the largest animal that has ever lived.

Penguins

The common name for all flightless, aquatic birds, penguins are only found south of the equator. Penguins have been grouped into 18 species and 6 genera, with most making their homes in Antarctica and the sub Antarctic islands, though others are native to the coasts of Australia, South Africa, South America, and the Galapagos Islands. Penguins are speedy and agile swimmers, but extremely slow on land. The regions we visit aboard MS Expedition are inhabited by 6 different species including the giant King Penguin who can grow up to 1 metre in height (found only on South Georgia Island); the Adelie Penguin named after French explorer Dumont d'Urville's wife; the Chinstrap Penguin identified by the distinctive black line connecting the black cap to below the chin; the Gentoo Penguin with its orange bill and white flash above and behind its eyes; the Macaroni Penguin (Only on South Georgia Island) who number roughly 12 million and are easily identified by the orange tassels meeting between the eyes; and the Rockhopper Penguin (Only in Falkland Islands) who are similar to the Macaroni in appearance but slightly smaller and have yellow tassels.

Suitability

We've given each of our tours a comfort rating and a tour pace, walking or cycling grade to give you a general idea about the level of activity on each tour and the standard of accommodation you will be staying in at the end of your day's adventure.

Often you'll stay in different styles of accommodation during your tour; so we make an average rating across the entire tour. For more information on where you'll stay each night, please refer to the day by day tour itinerary.

Preparing for your Tour

Climate

Antarctica Region

Polar Temperatures during Antarctic season: Min.: -15°C; Max. 12°C; Average 0°C.

Argentina

Argentina has a climate that ranges from subtropical in the north to cold in the temperate south. The Andes has erratic rainfall and flash floods from December to May. From June to September spring like sunny days temper the cold nights.

Clothing

Pack comfortable, casual clothing for all activities. Wind and waterproof outer layers are essential, and a jacket is provided in the cost of the cruise. Beware of tight clothing that leaves no room for trapped air, which is an excellent insulator. Wool, silk and some of the new synthetic fibres, like polar fleece, retain heat better than cotton.

Parkas

A wind and waterproof jacket is provided as part of the cost of your holiday.

Gloves

Keeping your hands warm and dry can be a challenge. Thin polypropylene gloves can be worn underneath warm outergloves. This allows you some protection from the cold when removing your gloves to operate your camera etc. We strongly recommend that you bring more than one pair of gloves, in case one gets wet (or lost).

Hat/Cap

Warm, woollen hat/cap to protect your ears, as well as a scarf, neck gaiter or other face protection, such as a balaclava.

Trousers

Water-resistant trousers of coated nylon or, even better, Gore-Tex® are essential for your comfort. They can be worn over your regular clothes to keep you warm and dry. We suggest that you purchase trousers a few sizes larger than you normally wear as you will be wearing them over other clothing. Gore-Tex® or similar fabrics are excellent for keeping out wind and water without trapping excess heat. Rain gear and Gore-Tex® products can be found in any outdoor sport clothing store. In addition to your waterproof trousers, warm ski pants are suggested if you have them. Warm trousers such as jeans, corduroys etc are also good.

Socks

Warm wool socks worn over a thin pair of silk, polypropylene socks should provide enough warmth and insulation for your feet. Bring several pairs of socks, since you will inevitably get your feet wet.

Outer Clothing

Woollen, knit or cotton sweaters/tops, polar fleece tops (medium weight), several cotton turtlenecks and T-shirts for layering on and off the ship.

Underclothing

Thermal underwear is highly recommended as it will keep you warm without adding bulk. Most polar travellers prefer a lightweight version.

Equipment

Sunglasses and sun cream

Personal toiletries

A refillable water bottle

Books/reading material

Camera and memory cards (and something to protect the camera when out in the elements)

Seasickness remedy

Walking poles

Footwear

Waterproof boots are available on-board for a small charge.

Also ensure you take good walking boots and trainers for relaxing.

Luggage: On Tour

One main piece of baggage and daypack. Remember you are expected to carry your own luggage so don't overload yourself.

Please note that a 15kgs luggage weight limit is sporadically enforced on the internal flight to Ushuaia, occasionally charges may be levied against passengers taking luggage in excess of 15kgs.

Luggage allowance on tour: 15Kg

General Information

Food

The prices for meals and drinks can vary greatly depending upon location and the prices detailed below are an average guide. In general you would expect that drinks purchased in a supermarket or local bar to be less expensive, whilst drinks in an upmarket bar or restaurant may be more expensive. The costs for meals may vary depending upon location, type of restaurant and number of courses eaten and so the prices given are an average guide. Local restaurants located off the beaten track may be less expensive, whereas an upmarket restaurant located in the centre of a major city may charge more.

Antarctica Region

Water £: The mighty seventh continent is the last true wilderness of significant size and is as far away from human influence as it's possible to get without leaving the planet. Antarctica is the coldest, driest and windiest place on Earth with no trees or rivers. Despite this, for a few weeks each year, its perimeter supports an astonishing array of life. Thriving rookeries of noisy penguins adorn the summer shores patrolled by skua hunting for an easy meal. In the sea, millions of tiny krill support a thriving population of whale and seal species while in the air albatross soar on the ocean breeze. Antarctica has a stark beauty which is without comparison. Ice-choked channels and snowy landscapes provide ever-changing scenes of beauty which are without comparison. Giant tabular icebergs calved from the edges of the ice shelf float majestically through the waves, their perfectly flat tops resembling giant aircraft carriers of epic proportions. This icy land has long been a draw for adventurers and explorers. In the early 20th century the likes of Scott, Amundsen, Oates and Shackleton all pitted their wits and strength against the harsh conditions. Some of these famous explorers were to pay for their curiosity with their lives. Today, with the advent of polar-rated expedition vessels, it is now possible for adventurous travellers to reach the edges of this remote region. To travel here is a real privilege; it's a journey that those with an interest in the natural world should strive to do at least once.

Cool Earth

Explore are delighted to support Cool Earth to reduce carbon emissions through preventing the illegal deforestation of the South America rainforest. One of the top sources of global carbon emissions, rainforest deforestation equivalent to the USA's annual emissions, it also destroys flora and fauna, sometimes to the point of extinction. It also degrades the lives and communities of the 350 million residents of the rainforest.

Cool Earth prevents the deforestation through its support of local communities as forest guardians and by focussing on areas in immediate danger of deforestation. It has so far protected over 350,000 acres of rainforest, with each acre saving an emission of 260 tons of CO2, as well as protecting rare animals and plants. When you travel on an Explore holiday we make a donation to Cool Earth that exceeds the impact of our customers flights each year. In addition to mitigating emissions, when you travel with Explore, you are helping to protect the source of 20% of the world's fresh water and oxygen, as well as the livelihoods of the 1.6 billion people who are reliant on the rainforest. www.coolearth.org
